INCREASED DRILLING CAPABILITIES IN NORTHEAST WISCONSIN

Expanded Scope to Save You Time & Money

Intertek-PSI is pleased to announce that our operation in Appleton, WI has acquired a new all-terrain (ATV) drill rig to better serve Northeast Wisconsin.

The new rig will allow us to more readily access agricultural fields and other more problematic sites with difficult surface conditions during all seasons of the year. It is mounted on rubber tracks and can be operated while in transit via remote control or direct tether. The tracked rig is shorter and narrower than a traditional truck-mounted rig giving it numerous site advantages, including:

- Access to soft, snow-covered, and/or wet areas;
- Entry into tighter spaces not accessible by larger rigs;
- Ability to access sloped terrain;
- Better accessibility to turf sites and agricultural properties.

The Intertek-PSI Solution

With a wide range of geotechnical engineering and drilling services, we provide you with the expertise, services,

Our extensive field and drilling services include:

- Borings
- Groundwater Sampling
- Mineral and Aggregate Exploration
- Monitoring Well Installation
- Pressure Meter Testing (PMT)
- Rock Coring
- Test Pits

and integrated personnel to make your project a success.

Intertek-PSI is ready to partner with you through our accredited geotechnical and construction materials testing laboratories capable of performing a wide variety of tests necessary to provide the services needed for your project. All projects are supported by internal quality assurance and safety plans giving you the subsurface and site information to ensure the success of your project.

Offering a full suite of services beyond geotechnical, we understand the entire project life cycle and use that knowledge to partner with you to make the best decisions possible.

“The decision to purchase a new all-terrain drill rig was an easy one to make. The capabilities of this new drill rig will allow us to better serve the needs and time frames of our clients. In addition to our Appleton location, our offices in Green Bay and Ripon, WI will have access to the use of this new equipment, which means our clients all over northeast Wisconsin will benefit from this investment.”
